

WEBINAR

Monday 24 April, 15:00 – 17:30

The role of faith-based actors in political processes – comparative experiences and implications regarding Ukraine and Russia

As part of CEC's ongoing engagement towards Ukraine and Russia, the European fellowship of churches is putting forward a platform for dialogue.

By drawing insights from comparative experiences, we offer an opportunity for debate to bring an enhanced awareness and understanding amongst faith-based actors on their possible contribution to dialogue and political processes on the war in Ukraine.

To that end, CEC invites Inclusive Peace, a Swiss-based 'think and do tank', to share comparative research exploring the modalities, roles, and key factors that enable or constrain the effectiveness of the involvement of faith-based actors in such processes.

To generate initial ideas as the Pathways to Peace Initiative is further developed, the webinar will include break-out group discussions to contextualise the comparative experiences with the ongoing conflict in Ukraine.
